

Student Report –Pembrokeshire and Derwen NHS Trust

1. Introduction

This report was produced from feedback received from medical and health care students who have been on placement at Hospital during the current academic year.

At the meeting in May 2004 there was no Medical student report given. This is the first year in which feedback from healthcare students has been added to this report.

2. Medical Student Feedback

Unfortunately only a very small amount of feedback was received from Medical students about their placements at this trust. This may be due to both the current exam period and the relatively small number of students at the trust during the year. However all of the feedback was positive, the lack of feedback is also positive – unhappy students are always willing to participate!

Specific feedback was received about the paediatrics placement. Students found the teaching to be of a very high standard. Staff were willing to teach and to answer any questions, this applied to nursing staff as well as medical.

One student requested that the parking permit system be reviewed; their permit only arrived on the last week of placement.

3. Health care Student Feedback - Physiotherapy

Feedback was again received from only a very small number of students. Once again the feedback was entirely positive, with the students enjoying their time at the trust.

The students were welcomed at the start of their placements; the introductory sessions helped them to feel at ease within the department. The teaching was of a high quality, students benefited from sessions with other healthcare professionals. Students were able to use the library and access the internet whilst on placement.

4. Overall

This is unfortunately a very short report due to a limited amount of feedback. However all of the feedback received indicates that students have found their placements at the Pembrokeshire and Derwen NHS trust to be enjoyable and valuable learning experiences.
